About me

— who i am —

I'm Amir Ali and I'm a Freelancer!

I am a professional web designer. I live in Bangladesh! I create web templates of any type, any style! I create my web templates without the help of any kind of framework or library! For this I use HTML, CSS & Vanila JavaScript! Again, if someone special goes, I can create their web template using REACT! The reason for designing my web without the help of any kind of framework is to make the template very attractive by coding it very lightly! I have been working on this web design for the past two years with a full experience! I love working in this profession and feel comfortable! This is my personal portfolio website. Here I have compiled a lot of job descriptions including my type of work and some samples for example! If any of you want to custom design a website for personal or organization as you like, you can contact me!

===== !!! Many Tany Thanks !!! =====

My services

what i provide

Web Design

I usually do all kinds of web design using HTML, CSS & Vanilla JavaScript! But if anyone wants, I can use REACT-Js to design any type of web as he wants!

Advertising

I am a Front-End Web Developer. I do not use any kind of framework or library in my coding so that my coding is light weight! But if anyone wants, I can just use any kind of framework or library for him!

Portfolio

Apps Design

I am also a Front-End Mobile or Windows's Apps Designer. But am Not Expert on Designing of Apps.

My skills

— what i know —

My creative skills & experiences.

I'm a web designer! I have been working on different types of web design with full experience for the last two years! In my portfolio website I have left some samples that I have already done. You can easily guess from my work how much my skills and experience! Many thanks for visiting my portfolio!
